

■ Make a puppet.

1 Push one blade of your scissors into the ping-pong ball on the join line. Cut all the way around the line.

2 Roll the paper so that it fits snugly inside one half of the ball. Then tape up the side of the paper to make a tube.

3 Tape the bottom of the paper tube to the ball. Draw a face on the paper, supporting it from the back with two fingers.

4 Press plasticine into the puppet's base to make it stand.
